Planning

The design of a complete professional kitchen for catering begins by studying the plan of the room and customer's needs: every aspect is analysed and evaluated with the utmost attention, to merge functionality with aesthetics.

Equipment

Other than the possibility of creating your own professional kitchen with a customized design and functionality, we offer you the opportnity to select elements and equipment with the most advanced performances.

- Custom Induction tops
- Wine refrigerators
- Cellars
- Outdoor bars
- Outdoor grills
- S/s hoods

Technology

Modular Design

Hygiene standards
higher than H1

Attentive eye

Products

The great versatility of tailor made kitchens allows you to adapt them to any environment, and the full customisation based on the needs and intended use, makes the ZED kitchens perfect in every context.

High end solidity and comfort.

Being at the forefront of technology is one of our priorities and this is why we're constantly connected with the companies producing equipment. This allows us to propose the most advanced solutions to optimize the production processes inside a professional kitchen.

Reliability of naval kitchens, technology of gourmet kitchens and design of domestic kitchens. We combine all this experiences to realize a kitchen that's different from any other... your very own one.
